2. It is gratifying to note that the Economic Research Area has continued achievement of 100% fulfillment of scheduled commitments.

3. It is emphasized that the Geographic Research Area should make every effort to assure a consistently high level of production throughout each of the remaining three months of this fiscal year in order to make up contributions in default in addition to meeting scheduled requirements, and that the Economic Research Area should continue efforts toward timely fulfillment with respect to the comparatively heavy production commitment of the final quarter.

2. A very heavy flow of NIS material to CBI in the final quarter of FY 1958 cannot be avoided if there is to be substantial attainment of the production goal for the year. Contributors are urged, therefore, to take such steps as are necessary to assure a consistently high level of production throughout each of the remaining three months of this fiscal year in order to overcome past production deficiencies in addition to fulfilling scheduled production for the period.
